## TECHNICAL CHARACTERISTICS

- Sealed Super Heavy Duty range with calcium expanded grid technology
- Closed type range with no maintenance during life time
- Long service life under repeated discharge-charge cycles
- Optimum capacity with EN / DIN containers

SPRINT SHD Sealed Maintenance Free series represents WINNER's innovation and contribution for reliable solutions at heavy duty vehicles with high energy demand requiring no maintenance during entire service life.

SPRINT SHD integrates a special plate group vibration resistance design for excellent performance under extreme temperature conditions, for higher discharging requirements. The special built-in-cover venting system provides anti flame protection and acid leakage prevention during vehicle tilting or high charging. It is ideal for vehicles under the EUR5/EUR6 lower emissions Directive.
